3. [] reports:

"The Board will be devoting part of its sessions to discussing what it should be doing and how it should organize during the final year of the first Reagan Administration. An unnamed Board Member has commented that 'Even though the DCI is a former member of PFIAB, obviously he is human, and probably gets irritated by our poaching in his waters. There is no solution to that problem as far as I can see. But it is worth asking whether he could give some attention to matters in which our Board could be of real assistance to him--thus permitting his briefings to us to include things which he wishes to draw our attention to, and which he might feel we could be of constructive help.' (from the PFIAB staff)."

4. The remaining PFIAB agenda items are status reports for ongoing Board projects:

-- NRO Review. PFIAB anticipates that the study will be completed toward the end of November. It appears that Task Force under [] will support continuation of the present NRO structure. [] may address this topic and DCI authorities under EO 12333.

-- CI Review. After visits to [] FBI and CIA offices [] Task Force concluded that the Community is in good shape and that there is no need for reorganizing or centralizing the CI function. The Board's comments have gone to the President via the NSC.

-- Political Analysis Review. [] group, which is reviewing SOVA's political assessments, has nearly completed its study of Agency reporting on the Polish crisis. The group's conclusions are not known. The analysis of reporting on the invasion of Afghanistan is under way. The third project, which was to be a review of intelligence support to the arms negotiators, has been in limbo ever since the Board was given [] memo about the adverse affect a time-consuming Board review would have on his already limited resources.
